

Omar Ali Kandil

Game Developer.

+20 10-913-770-92 | omarkandilfan@gmail.com | [GitHub](#) | <https://www.linkedin.com/in/omar-kandil-jf/> | [Games Portfolio](#) | [LeetCode](#)

Summary

Game developer focused on creating unique experiences, currently targeting Multiplayer game development as well as General Game Development, Interested in VFX creation using shadergraph and particle systems , With proven experience in AI-Training @outlier

Focused on learning and improving to acquire the skillset to achieve my dream of opening my own game studio.

Education

Game Programming-Information Technology Institute 9-month Diploma (Smart Village).

Oct 2025 – Present

Focus Areas:

Game Design | Gameplay Systems Architecture | AI Logic | Clean Code | Optimization | Production Workflow | Network Programming

Bachelor's in Computer Science

-Oct 2021 – Jun 2025

Faculty of Computers and Artificial Intelligence, Damietta University, Egypt

- Graduation Project: [EcoNerve](#), A+
- GPA:3.14

Experience

Software Engineer (AI Training Data) — Outlier.ai

Jun 2024 – Present

- Contributed to AI projects including Claude 3.7, Gemini 2.5 pro and OpenAI GPT O1,4.1 , completing 150+ tasks across frontend development, API integration, structured data generation, and SQL.
- Improved task accuracy by 50% in 20+ cases and reviewed 30+ assignments with detailed feedback and quality ratings.
- Built and annotated Data for code generation, and web tasks, supporting model training and evaluation.
- Served as a peer reviewer, maintaining a performance rating of 80%+ across complex, multi-domain projects.

Projects

Jellyfish Multiplayer horror game ([Video](#))

- Developing a multiplayer horror speedrunning game using Unity's NGO
- Delved into the full game development pipeline starting form market research and game design to development.
- Tested and Integrated both UGS and Steamworks (using the facepunch transport) API for lobby and relay.
- Handled lobby creation, joining, searching and game initiation.
- Jellyfish and speed shader using shader graph.

Mini Puzzle Scene ([Video](#))

- Created the flame particle effect
- Created a puzzle system using a slot system
- Mini cutscene using Cinemachine.
- Used spatial audio, reverb zones, and ambience to make the environment feel alive.

Blind Leap (MiniJam – 48 Hours) .[Itch](#)

- Developed a 2D physics-based puzzle game using C++, SFML, and Box2D.
- Implemented real-time object placement system using keyboard input (1,2,3) for wall selection and mouse input for spawn/despawn logic.
- Integrated Box2D physics engine for rigid body dynamics, collision handling, and impulse-based interactions.
- Managed input handling, physics updates, and rendering pipeline using SFML.

Match Master (Unity Game) [GitHub](#)

- Developed a puzzle game inspired by Candy Crush, featuring unique abilities such as adjacent tile explosions, same-color chain clears, and row/column bombs.
- Utilized Unity prefabs and particle systems to create dynamic visual effects and reusable game components.
- Implemented scalable grid mechanics and optimized tile-matching logic to ensure smooth gameplay and responsiveness.

Skills

- C# - C++ - JavaScript - CSS – SQL – Nodejs – ExpressJs - MongoDB
- Algorithms - Data Structure – OOP – Game Design – Level Design.
- Problem Solving - Mathematics - GitHub - Team leadership – Communication – Team Building.
- Unity – Unreal – VR –Game Networking Programming – Unity ShaderGraph

- Languages: Arabic (native) – English (Full professional proficiency)
- Additional Skills: Photography, Image & Video Editing.

Certifications

- [The Art Of Level Design Course](#)
- [Unreal Engine 5: Full Beginners Course](#)
- [DEPI Business English](#)
- [DEPI MERN Stack Graduation Certificate](#)
- [Introduction to Web Development with HTML, CSS, JavaScript](#)
- [Getting Started with Git and GitHub](#)
- [Introduction to Cloud Computing from IBM](#)
- [Delivering Quality Work with Agility from IBM](#)
